Arkansas Oil and Gas Commission
301 Natural Resources Drive, Suite 102
Little Rock, Arkansas 72205

Re: ORDER REFERENCE NO. 003-2014-01

Application of SEECO, Inc. for Authority to produce its Abram 10-8 #15-30H5 Well, pursuant to Arkansas Oil and Gas Commission General Rule B-43(o), and to share the costs of such well and the natural gas produced therefrom between the working interest owners and royalty owners of the existing units composed of Section 5, Township 9 North, Range 8 West and Sections 32, 29, 31 and 30, Township 10 North, Range 8 West, Cleburne County, based upon the sharing formula set out in detail below

Commissioners:

SEECO, Inc., 2350 N. Sam Houston Parkway East, Houston, TX 77032, hereby applies to the Arkansas Oil and Gas Commission as follows:

1. The Applicant is the operator and Applicant and its participating partners are majority leasehold working interest owners in Section 5, Township 9 North, Range 8 West, and Sections 32, 29, 31 and 30, Township 10 North, Range 8 West, Cleburne County. The Applicant proposes to drill a cross unit horizontal well from a surface location in the Southeast Quarter of Section 30, Township 10 North, Range 8 West with a bottom hole location in the Northwest Quarter of Section 5, Township 9 North, Range 8 West, with a measured depth of approximately 10,968 feet (3,045 feet total vertical depth) in the Fayetteville Shale Formation. The well has a proposed perforated horizontal section of approximately 6,589.98 feet. The proposed allocation of cost, expense and production is depicted on Exhibit “C”. Geological maps depicting the Fayetteville structure and thickness are enclosed with this application as Exhibits “D” and “E,” respectively.

2. The Applicant proposes to make an initial allocation of cost for the proposed well between Section 5, Township 9 North, Range 8 West, and Sections 32, 29, 31 and 30, Township 10 North, Range 8 West, Cleburne County, based upon an area in acres (“allocation area”) defined by an exterior boundary 560 feet perpendicular to both sides of the estimated perforated well bore and a radius extending 560 feet from the estimated first perforation (toe) and last perforation (heel) of the well bore. The Applicant estimates that the total allocation
area encompassing the perforated well bore is approximately 191.96 acres. Approximately 22.13 acres or 11.53% of the total area is within Section 5, Township 9 North, Range 8 West, approximately 140.61 acres or 73.24% of the total area is within Section 32, Township 10 North, Range 8 West, approximately 5.12 acres or 2.76% of the total area is within Section 29, Township 10 North, Range 8 West, approximately 10.72 acres or 5.59% of the total area is within Section 31, Township 10 North, Range 8 West, and approximately 13.38 acres or 6.97% of the total area is within Section 30, Township 10 North, Range 8 West.

3. The Applicant proposes that the above allocation of 11.53% to Section 5, Township 9 North, Range 8 West, 73.24% to Section 32, Township 10 North, Range 8 West, 2.67% to Section 29, Township 10 North, Range 8 West, 5.59% to Section 31, Township 10 North, Range 31 West, and 6.97% to Section 30, Township 10 North, Range 8 West, be applicable to all actual costs for the drilling of the well through and including the setting of production casing. Operations will be conducted under the terms of an Arkansas Oil and Gas Commission model form operating agreement. The agreement will provide for a 400% penalty for a non-consent election for the drilling of the proposed well. The following terms will also govern the drilling and completion of the proposed well:

   a. After the setting of production casing, but before a completion attempt is made, drilling costs will be reallocated, based upon the actual perforated interval (distance between first and last perforations) available for completion in the as-drilled well bore. This re-allocation may result in a revision to working interest and all costs paid to that point will be adjusted.

   b. If a well bore is lost during the drilling or completion operation and a new well bore is proposed with an alternate azimuth that will result in a further re-allocation of working interest participation or in the allocation of production, the replacement well will be treated as a new well proposal under the operating agreement with revised interests. All parties that participated in the drilling and completion attempt in the initial well will be liable for their proportionate share of the actual cost of operations to the point of setting a plug for side-track operations, based on their original interest.

   c. Should any party that elected to participate in the initial well elect to not participate in the replacement well, the penalty for a non-consent election in the replacement well will be imposed on only the replacement well costs. A non-participating party in the initial well will not be afforded an opportunity to participate in the replacement well and the penalty will be imposed on the cumulative cost of the initial well and the replacement well.

   d. Any re-allocation after the setting of production casing will be final for the completion attempt and for the ultimate allocation of production from the well between the respective units.
4. The Applicant states that the granting of this application will be protective of the correlative right of all interested parties and will prevent waste of the natural gas by permitting the most efficient method of developing the resource within the two governmental section which are the subject of this application.

5. The parties listed on Exhibit “A” are the interested parties in this proceeding and are the parties who should be given notice. Applicant requests that the Arkansas Oil and Gas Commission issue an order to the mineral leasehold working interest owners to (a) join as a working interest owner in the drilling of the proposed well based upon the allocation proposed above or, in the alternative, (b) elect to be a non-consenting working interest owner under the terms of the operating agreement which governs the unit in which their leasehold or mineral interest is located. Any owner of leasehold working interest who fails to timely elect either alternative should be deemed to have elected alternative (b) above.

6. The names and addresses of parties interested in this proceeding are set forth in Exhibit "A" attached hereto and made a part hereof.

7. Please note the appearance of Thomas A. Daily of Daily & Woods, P.L.L.C., P.O. Box 1446, Fort Smith, Arkansas, 72902, on behalf of applicant.

Very truly yours,

Thomas A. Daily
